

"THE UNEXAMINED LIFE
IS NOT WORTH LIVING."

SOCRATES

Socrates @ SaddleBrooke

THINKING DEEPLY ABOUT ORIGINS AND DESTINY

Objections to the God Hypothesis

After three years of our scientific investigation and twenty-six public presentations, the Socrates@SaddleBrooke Club has concluded that the universe, planet earth and all of life have been intelligently designed, most likely by a Creator.

View all the presentations at www.socratesSB.club/videocasts

If God exists, then how might one explain all the conflicting belief systems? In Socrates Season 4 we start investigating that question by examining the most commonly held objections to Intelligent Design and its implications for a Creator God.

OCTOBER "Evil" - If God exists and is so infinitely powerful and good, why is there so much evil and suffering in the world?

NOVEMBER "Miracles" - If natural laws have been scientifically proven, how can there be miracles? Aren't miracles violations of Natural Law?

JANUARY "Heaven" - Isn't heaven just superstitious wish fulfillment? Shouldn't we be more focused on solving our challenges here in this world?

FEBRUARY "Morality" - Aren't ethics and morals simply what we decide they should be for our current time and place? There are no absolutes - right?

MARCH "Utopia" - Aren't we making evolutionary progress toward "heaven" here on Earth? Why would we need a God?

APRIL "Religion" - Don't all religions teach basically a similar message of salvation from this world? Don't all religious beliefs eventually lead to the same God?

Season 4 opens October 10, 2024, 4:00-5:30pm

(meets on the second Thursday of the month)
